

LASER EYES

CLUB(LSE)

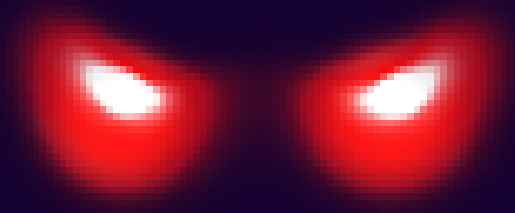

RUG, SCAM OR SAFU?

Due to the rise of cryptocurrency adaptation, lots of new projects are launching on both BSC and ETH ecosystems.

Because of the decentralized nature and lack of regulation in this space many projects are doing rug pulls and scams and running away with the investor's money.

Our Vision is to clean this space from rugs and scams and make it safe for investors to invest in any project of their choice.

LASER EYES SCAN

To fight this rug/scams, Laser Eyes came up with an automated tool where you can enter the contract address of any Dx Sale to get an automated analysis of the same.

In the current version, it is checking the only Dx Sale, but it will be upgraded to include all the presales on any platform.

We provide a detailed review of any presale project and identify potential rugs and scams. In the future, the tool will be upgraded to check all the contracts.

Example Review of a potential scam

@lasereyesscan to know
about more projects.

1: LP unlock date is 2021-08-27 19:01:00 which is too early. Once the LP unlocks the owner/dev can take out the entire tokens from LP (Rug Pull) and no one will be able to sell ❌

2: BNB contributed to LP is 70% which is OK. This means they are keeping 30 % of raised BNBs (120 BNB) with themselves. It could have been 80-90% for a healthy LP

3: It is listing at 2% premium

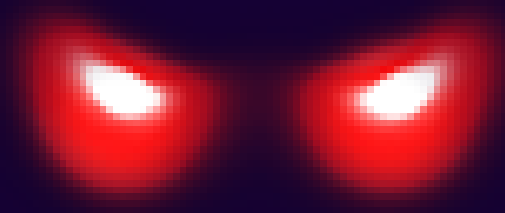

4: Soft cap is very low. It could be more

5: The presale will go for 2 hours which is a decent time for a Pre-sale

6: 93% tokens are held outside and are unlocked other than the pre-sale and burn wallet. Please ask the dev about these tokens. Dev can use them to dump on listing ❌ ❌ ❌ ❌ ❌ ❌ ❌

Result of a the potential scam caught by Laser Eyes Scan

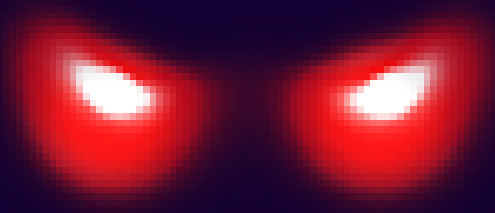

LASER EYES TOKEN

Laser Eyes token will be used for service fees and airdrop rewards. One will be required to hold the Laser Eyes tokens to use the platforms.

LSE tokens offer features such as auto LP, static rewards, and auto burn on every transaction.

LSE is a deflationary token with real use case Beta Version's first product laser eyes scan (<https://lasereyesscan.com/>) is already out and it is being used by many to detected scams and rugs on the Dx Sale presale.

LSE TOKEN FEATURES

Static Reward(Reflection)

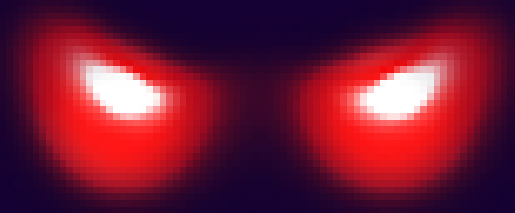

Every transaction(Buy/Sell) is taxed and a portion of the tax is distributed among token holders

Auto LP acquisition

Every transaction(Buy/Sell) is taxed and a portion of the tax is added to the LSE-BNB liquidity pool.

Burn

Every transaction(Buy/Sell) is taxed and a portion of the tax is burned making the coin deflationary and increasing the value of the remaining coin.

LASER EYES USE-CASES

(LIVE) Laser Eyes Scan

It is the first product of Laser Eyes Club. Laser Eyes Scan is currently in Beta and it helps you to identify the rug/fraud projects. Laser Eyes Scan is an automated tool with thousands of visitors every month. A future update of Laser Eyes Scan will include features such as screening source code for scam functions, checking LP status, checking ownership status, checking dev wallet history, and many more

Review Another Project

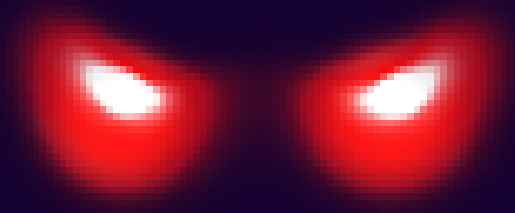

LASER EYES USE-CASES

Laser Eyes Portfolio Manager

Laser Eyes Club will create a portfolio manager app that will allow one to track the price and portfolio of their tokens. It will also show the price of tokens whose price is not available on Trust wallet or Metamask.

Laser Eyes Education

Laser Eyes Club will create a learning platform with amazing content where users can learn about cryptocurrencies and get airdrop to learn. Users will easily be able to differentiate between scams and understand how blockchain and cryptocurrencies work.

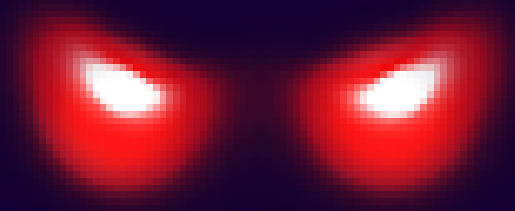

LASER EYES USE-CASES

Laser Eyes Launchpad

Laser Eyes Club will create a launchpad where new tokens can create their pre-sale. On the launchpad, all the projects will be audited before launch. They will only be allowed to do their pre-sale if they pass the audit

Laser Eyes Locker

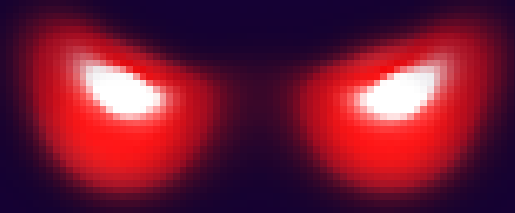

Laser Eyes Club will create a locker service so that projects can lock their liquidity and tokens for a competitive price. This will stop them from rug-pulls and prevent investors from scams.

LASER EYES USE-CASES

Laser Eyes Audit Service

Laser Eyes Club will launch an audit service to audit smart contracts. The audit will be complete and will assure investors about the technical and fundamentals of the project.

LASER EYES TOKEN TAX

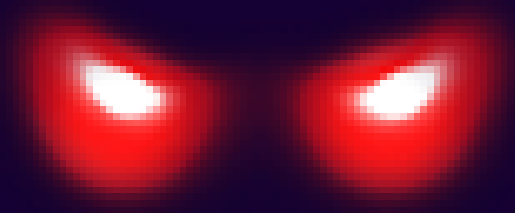

Each Transaction will be taxed 10%. The tax will be sub-divided into four parts

7% Marketing

1% Burned

1% Auto LP

1% Static Reflection

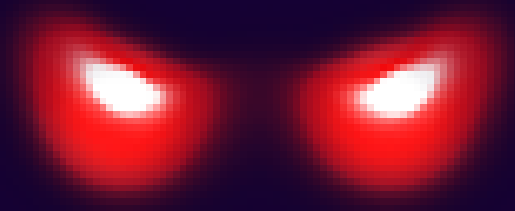

LASER EYES ROADMAP

Q3 2021

Listing on PancakeSwap,
Coinmarketcap, and Coingecko,
Marketing and partnerships,
Laser eyes scan full product launch.

Q4 2021

Marketing and partnerships,
Learning platform
Audit service
exchange listing like whitebit, bitmart, mxc.com
and gate.io
Team expansion

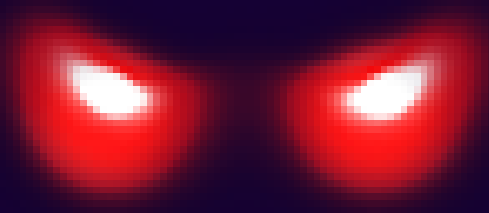

LASER EYES ROADMAP

Q1 2022

Launchpad
Locker service
